

Real-time, on-the-spot validation of A1 milk type for farmers, insemination technicians, and milk processors.

- Non-invasive genotyping of cows
- Directly in the field
- No electricity needed - just add hot water

THE TECHNOLOGY

The DNAFoil® technology is a unique, innovative DNA detection technique that amplifies a single copy or a few copies of targeted DNA (e.g. pork DNA) into millions of copies.

Fast

Self-administered

On-site
